PREFACE.

The BROOKLINE DIRECTORY for 1892, No. 13 of the regular series, is offered to our patrons with no little confidence, as this year we have made changes which we hope will meet with general approval. Following the custom now almost universally adopted by the best compilers of similar works, we print the surname but once on a page (except in the case of advertisers); thereby, as we believe, greatly facilitating the use of the book.

We shall be pleased to receive suggestions, also, at any time, which will assist in making future editions still more valuable. We do not claim that there are no errors inthe present volume, but we have conscientiously striven to reduce its imperfections to the minimum.

We append the usual synopsis.

Number of names in 1892 . . .	5,520
" " " " 1891 . . .	4,963
Increase	557

We extend our cordial thanks to those who have favored us with a share of their advertising patronage, and desire to express our appreciation of all the aid we have received in the task of compilation.

Yours most respectfully,

W. A. GREENOUGH & CO.,

REGULATIONS CONCERNING FIRE ALARMS.

First alarm to be given on bells and whistle, by striking four rounds.

Second alaam to be given by ten blows struck once.

1 One stroke at M. every day.

1-1 Two strokes slow for fire out, and all apparatus under way will return to quarters.

One first alarm from boxes 32-34-35-36-37-38-39-41-43, Hose 3 will take position in Hose 1's house.

On second alarm from boxes 16-17-18-21-23-25-27-29, the Chemical engine will take position in Hose 1's house.

Members of companies not responding on first alarm shall report at the house of their respective companies, and remain there twenty minutes, unless the recall signal has been sounded. After a first alarm has been given and before the recall signal is sounded, should an alarm be given from another box, all unemployed first and second alarm companies will respond.

22 Signal for No School, 4 rounds.

Also a special box for Town Hall, except between the hours of 7 and 8.30 a. m.

EUGENE N. DAVIS, Supt.

INFORMATION FOR YOU.

Keys to the boxes may be found at the nearest house.

Before ringing in an alarm be sure that a fire actually exists.

Do not give an alarm for a fire seen at a distance, as all needless alarms are an expense to the town, and should be avoided as much as possible.

To give an alarm, pull down the hook in the box once (without jerking) and let go. Wait a few seconds and if you hear no clicking of the wheels, pull again (no clicking, no alarm); if then no movement is heard, go to the nearest box and try, of which report immediately, to the superintendent or at the station, the box out of order.

All persons giving fire alarms are requested to remain by the box, if possible, to direct the fireman to the fire. Each box contains a small bell which if heard before you pull indicates that the alarm has been previously given.

After the first alarm has been rung in, all other alarms or siginals are given only by the engineer.

Tampering with any of the apparatus connected with the Fire Alarm Telegraph will be prosecuted to the full extent of the law.

SPECIAL NOTICE.

The fact that an alarm box is located near their residence and where the key is kept, should be known to all persons, both male and female; and the simple manner of giving an alarm in case of fire should be a matter of common education. The Board of Engineers recommends to all persons who may see this notice, that they make all neccessary inquiries to enable them, in case of need, either to get the key and pull an alarm in, or direct others to do so. Time saved in this way may prevent conflagration.
